## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a fusion protein, classified in class 530, subclass 350.
- II. Claims 10-15 and 16-25, drawn to a nucleic acid construct, expression vector, host cell comprising the expression vector and drawn to a method of assaying for the expression of a fusion protein using said vector, classified in class 536, subclass 23.5, class 435, subclass 320.1, in class 435, subclass 325 and in class 435, subclass 69.7.
- III. Claims 26-30 and 31-33, drawn to a DNA construct and method of assaying the ability of a mutant receptor to bind a ligand using said construct, classified in class 536, subclass 23.1 and in class 435, subclass 6.
- IV. Claims 34-36, drawn to an imaging method detecting the expression of a fusion protein *in vivo*, classified in class 424, subclass 9.34.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Groups II-IV are biologically and functionally different and distinct from each other and thus one does not render the other obvious. The fusion protein of Group I is not used in the methods of Groups II-IV. The operation, function and effects of the fusion protein of Group I are completely different and distinct from the operation, function and effects of the methods of Groups II-IV which assay for the expression of a fusion protein, Group

Art Unit: 1636

II, assay for the ability of a mutated receptor to bind a ligand, Group III, and an imaging method detecting an expression of a fusion protein, Group IV. None of these methods are related to the product of Group I because they neither require the use of the fusion protein nor are they drawn to a method of making the fusion protein. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
